Professional Summary

Computer Science student focused on full stack and AI-driven application development using modern tools. Strong foundation in data structures, scalable systems, and problem solving, with hands-on experience in real-world product development.

Technical Skills

Languages: Python, Java, JavaScript, SQL, C

Frameworks: Django, React.js, Next.js, Node.js, Express.js

Tools & Tech: Docker, AWS, Git, Postman, Linux

Databases: MongoDB, MySQL, Firebase

Concepts: REST APIs, System Design, OOP, Data Structures, AI Integration

Experience

FloLabs Innovations Group

Dec 2025 – Present

Full Stack Developer Intern

- Built and deployed frontend-backend systems using Next.js, Python, and Django, integrating AI-driven workflows for dynamic web applications.
- Containerized services with Docker and contributed to scalable product development across multiple startup projects.

Princeton Smart Engineers

Feb 2026 – Present

Data Science Intern

- Worked on data analysis and machine learning pipelines, improving model accuracy through preprocessing and feature engineering.

AccioJob

Dec 2022 – Jul 2024

MERN Full Stack Developer Trainee

- Developed full-stack applications and strengthened problem-solving skills through structured DSA training.

Projects

Relay – Multi-Provider AI Routing Platform

[Code]

Built an AI chat platform with Smart Relay and Hive Orchestra modes that route prompts to specialist models or multi-model pipelines for deeper reasoning. Implemented persistent memory, session branching, and real-time analytics across 11 active models from multiple providers.

Tech Stack: React + Vite, Tailwind CSS, Node.js, Express, AI SDKs

Typing Cat – Real-Time Typing Test Platform

[Live]

Created a multi-mode typing app with React Hooks and Context API for smooth UX. Integrated Firebase for authentication and real-time score tracking.

Tech Stack: React.js, Firebase, Context API, HTML/CSS

FinFlex – Finance Tracker Web App

[Live]

Developed a full-stack finance tracker for real-time insights into income and expenses. Implemented secure authentication, CRUD operations, and Redux state management, improving data retrieval efficiency by 30%.

Tech Stack: React.js, Node.js, Redux, Firebase, Ant Design, JavaScript

Education

KLE Institute of Technology, Hubballi

2023–Present

B.E. Computer Science

CGPA: 6.7/10.0

Certifications

- MERN Full Stack Development (NSDC Certified)
- Oracle Cloud Infrastructure AI Foundations Associate
